Structural Steel Detailer

(On-Site – 8596 Road 164, Listowel, ON)

Description: Dynamic Millwrights Inc. is looking for a motivated, mid level **Structural Detailer** to join our team focusing on structural and miscellaneous metals design and detailing.

Our goal is to design and fabricate all components efficiently and to the highest standard.

Responsibilities:

- Read and determine the requirements of the project contract documents and communicate freely with Engineering Manager and Structural Lead regarding these requirements.
- Prepare submittal and fabrication drawings for projects with various complexities.
- Collaborate with other detailers and coordinate detail drawings to prevent conflicts to reduce errors in fabrication and erection drawings.
- Respond to any changes from Project Manager and work with Structural Lead in troubleshooting customer problems.
- Prepare clear, complete, and accurate assembly and erection drawings indicating dimensions, tolerances, and connection requirements per company drafting standards.
- Generate advance bill of materials, saw, and shipping list to assist in procurement and shipping of material.
- Complete work orders and prepare issue for fabrication job packages.
- Export NC and DXFs files per project requirements.
- Assist Shop Manager in resolving any issues occurring during fabrication phase.
- Participate in fabrication review on the shop floor occasionally.
- Track project updates and report status on a weekly basis to Engineering Manager.
- Utilize Microsoft Teams for coordination with team members.
- Other Duties as Assigned

Requirements:

- Post-Secondary Diploma in Structural Detailing or equivalent.
- Proven 2 to 3 years of experience as a Structural Steel Detailer, with a portfolio of completed projects.
- Proven understanding of steel fabrication and building construction required.
- Must have strong ability to interpret Architectural and Structural Drawings.
- Proficiency in using structural detailing software, such as Advance Steel, SDS/2, etc.
- Ability to understand and interpret welding symbols.
- Must have the ability and willingness to learn new software and skills.
- Strong attention to detail and a commitment to producing accurate and high-quality work.
- Ability to identify and resolve design issues and conflicts efficiently.
- Ability to prioritize ensuring all timeframes and deadlines are met.
- Proficient computer skills in Microsoft Excel, Word and Outlook
- Valid Driver's License

Competitive wages, Company Benefit and Group RRSP and DPSP package offered.
